**Home Services Shop, Westchester's premier handyman service, continues to grow
Announcing expansion of commercial maintenance and repair division under
leadership of top sales executive**

Faced with budget restraints, property owners are outsourcing more of their maintenance and repair jobs. In response, Home Service Shop, in Pleasantville, NY, is expanding its Commercial Division by hiring a Sales Manager to cover Westchester County. Stephen Kudzy comes to us with over twenty years of business development and customer service experience. He focuses on property managers and business managers who are seeking cost-effective ways to meet their facility's maintenance, repair, and small project requirements.

Kudzy says, "All businesses are looking at their overhead costs. We provide plumbing, carpentry, painting, and general handyman services 'just in time'—and clients pay only when they need us. Companies do not need a full-time staff when they have us to address their facility's needs."

Home Services Shop provides a one-call solution to businesses that may not have the time or expertise to address all of their property's requirements. The firm maintains a staff of highly qualified and multi-skilled technicians who are very customer service focused.

Visit www.homeservicesshop.com for more information on our Commercial Services.

Homes Services Shop has performed over 25,000 jobs since opening in 2001. The company distinguishes itself from the single independent handyman or small contractor by letting homeowners know there is a company behind every job performed. Home Services Shop provides insurance, licenses, and bonding and focuses on hiring the right technicians. Each employee is thoroughly background checked and is hired for strong customer service skills as well as technical skills.
